

PMT Courses - GCSE Mock Preparation 2022

Our two-day online courses are a great way for students to prepare for their January mock exams. Our experienced tutors will guide students through important topics likely to come up in exams. Alongside revision, exam technique will be covered throughout so students learn how to maximise marks. Students will go into their exams feeling confident and prepared.

Our Christmas courses take place **online** using Google Classroom.

Course	Dates	Timetable & Booking
Science	18-19th December	Click here
Maths	21-22nd December	Click here

	Sat	Sun						Sat	Sun
	17	18	19	20	21	22	23	24	25
Science									
Maths									

Science

Our science course will cover all three sciences, focusing on the most challenging topics and questions for each subject. Often students struggle with the same types of questions for each science such as titration calculations for Chemistry and long-answer questions for Biology.

This course is suitable for students studying **separate** or **combined** science.

How do our online courses work?

- We use Google Classroom for our online courses. Students are sent the link to join the Classroom the day before the course starts.
- Inside the Classroom students will find digital copies of all the handouts.
- The lessons take place on Google Meet. On the morning of the course, the Meet link will be shared in the Classroom's stream.
- Lessons are recorded and saved in the Classroom for students to revisit whenever they wish. Any resources used by teachers during the course are also saved in the Classroom.
